

SCIENCE OFFICER IN THE FIELD OF TRANSPORT AND URBAN DEVELOPMENT

*The **European Science Foundation (ESF)** seeks a Science Officer to support the field of Transport and Urban Development for the **ESF/COST Office** in Brussels, presently carrying out a domain reorganisation. For general details see <http://www.cost.esf.org>*

Experience is required in one or more areas of Transport and Urban Development and Management - an interdisciplinary domain bridging two main sectors:

- Transport development, systems integration, modes, infrastructure; mobility management; environmental impacts; safety & security; social & human impacts*
- Urban architecture, planning & design; urban engineering; urban development, infrastructure and safety*

The job requires recent experience in research, development and related management, the ability to work in an international team, a flexibility to travel, a good working knowledge of English is essential and the selected person should ideally be available by 13/02/2006.

Contract terms to be negotiated based on experience.

Applications (electronic) should be addressed to the Director, COST Office and sent to

nmombaerts@cost.esf.org. Reference code: TUD

Closing date: 11 November 2005
